Ratio

Find the balance between sitting
and standing at your desk

Ratio: Your Desk, Your Way

The Ratio height adjustable desk enables a smooth transition between sitting and standing. Users can vary their posture as they need, to find the right balance between sitting and standing throughout the day.

Ratio can be specified as single, 120 degree, or back-to-back desks in unlimited clusters, and work with our other solutions to complete any floor plate.

Electric height adjustment means a user can adjust their desk to exactly the right height for them at the touch of a button.

Sit. Stand. Move. Repeat

Research shows that moving from one posture to another is beneficial to our health – people who move more, feel better. And people who feel better, work better.

Effortless Design

With its clean lines and lightweight design, Ratio has been designed to blend into the modern office environment. Ratio is available with two kinds of electric height adjustment, and there are a number of different screen options, depending on the configuration of the work space. Ratio's design also ensures that ergonomic tools such as monitor arms are fully supported.

Ratio 120 desks extend planning possibilities across the floorplate.

Design Heritage: A Story Continued

Herman Miller has always believed in the importance of supporting a variety of postures and encouraging healthy movement while you work. An alternative to sitting down at the desk is woven into our design history. In the 1960s both Robert Propst and George Nelson pioneered the concept of alternative working positions.

Propst, the creator of Action Office, the world's first open-plan office system, designed a hybrid of a stool and chair he termed a 'perch'. Nelson, who was appointed Design Director in 1947, enjoyed standing around at work and thought others might also. He designed a stand-up, roll-top desk for the Action Office line. Both designers recognised the benefits of standing whilst working, long before the term 'ergonomics' was widely known or understood.

Details and Features

Electric height adjustment, including programmable pre-sets for use at assigned desks.

Cable management options including high capacity trays, to ensure all cables are kept tidy underneath the worksurface.

Vertical cable management allows for an uncluttered transition as desk height changes.

Screen options to create boundaries and add privacy, with fixed screen or the option for one that moves up and down on single desk to afford the user additional privacy.

The high capacity vertical riser provides 360° access for power entry in a compact form.

Back-to-back tray with lid to neatly hide cable management.

The distinctive H profile design ensures an uncluttered workspace.

The castor option on single sided desks provides a fully mobile sit-stand desk.

Polished aluminium options for work surface supports and feet for an enhanced aesthetic choice.
